PBIT has recently completed our accreditation to be able to offer Energy to our customers through Fidelity Energy.

40% of businesses in the UK have never switched energy suppliers, we believe this is due to the resource required to procure and compare quotes that come back with ambiguity and additional abbreviated charges such as FIT, EMR that don't show a true comparison for your company.

Let PBIT do the heavy lifting for you and come back with a comparison from the market in a simple, easy to compare document.

We offer a much wider choice than any one supplier could offer our clients by going direct. From SME offices, sports grounds to high usage manufacturing sites allow PBIT to show you what we can do for your company.

### What this means for you as our customer:

- Fixing a price for your company- regardless of Brexit, Rising Oil Prices and Market Fluctuations
- Forward purchasing- even if you are in contract we will secure savings for your next contract today
- Bill Validation- are you sure your energy bill is correct? Let PBIT tell you.
- Option for Green Energy Supply

### What we need:

1. Copy of your latest Electric and Gas Bill
2. Signed LOA on headed paper

*This does NOT allow a contract to be signed on your behalf or put your business in any obligation to accept any of our quotes.*

### What we will do:

Come back to you with a comparison of the market for your business.
